

**Summer Institute
GIS Education Resource Workshop
EVALUATION FORM COMPILATION OF RESPONSES**

June 28, 2005: 54 Surveys Returned

1. How well did the content of this session:	Excellent	Well	Fair	Poor
A. Meet your expectations?	22	22	5	1
B. Address the specified learning objective?	26	18	6	0
C. Offer new insights & skills to someone with your level of knowledge and experience?	36	7	9	0
D. Incorporate attendee participation?	17	17	15	1
E. Include education specific examples and applications? F. Apply GIS to education?	35	12	2	0
F. Apply GIS to education?	35	14	1	0

2. How would you rate:	Excellent	Well	Fair	Poor
A. The delivery of the session?	18	21	11	0
B. The presenter's enthusiasm for the subject?	31	16	3	0
C. The presenter's knowledge of the subject?	36	11	2	0
D. The presenter's preparation for the session?	27	20	6	0
E. The training aids used (handouts, slides, web sites)?	29	13	8	1
F. Apply GIS to education?	35	13	3	0

3. Please answer the following questions:	Yes	No	Maybe
A. Will this session be helpful to you in your current position?	37	4	10
B. Will this session be helpful to you in your future assignment?	37	1	11
C. Would you recommend this session to a colleague?	39	1	0
D. Would you recommend the presenters to a colleague?	43	2	6

July 12, 2005: 57 Surveys Returned

1. How well did the content of this session:	Excellent	Well	Fair	Poor
A. Meet your expectations?	45	9	2	0
B. Address the specified learning objective?	41	10	5	0
C. Offer new insights & skills to someone with your level of knowledge and experience?	45	8	4	0
D. Incorporate attendee participation?	32	15	9	0
E. Include education specific examples and applications? F. Apply GIS to education?	46	10	0	0
F. Apply GIS to education?	48	7	2	0

2. How would you rate:	Excellent	Well	Fair	Poor
A. The delivery of the session?	47	10	1	0
B. The presenter's enthusiasm for the subject?	56	2	0	0
C. The presenter's knowledge of the subject?	57	1	0	0
D. The presenter's preparation for the session?	53	4	0	0
E. The training aids used (handouts, slides, web sites)?	51	5	1	0
F. Apply GIS to education?	51	7	0	0

3. Please answer the following questions:	Yes	No	Maybe
A. Will this session be helpful to you in your current position?	43	1	13
B. Will this session be helpful to you in your future assignment?	42	1	14
C. Would you recommend this session to a colleague?	56	0	1
D. Would you recommend the presenters to a colleague?	56	0	1

July 26, 2005: 30 Surveys Returned

1. How well did the content of this session:	Excellent	Well	Fair	Poor
A. Meet your expectations?	22	7	0	0
B. Address the specified learning objective?	22	7	0	0
C. Offer new insights & skills to someone with your level of knowledge and experience?	24	6	0	0
D. Incorporate attendee participation?	7	10	12	1
E. Include education specific examples and applications? F. Apply GIS to education?	21	7	1	0
F. Apply GIS to education?	21	8	1	0

2. How would you rate:	Excellent	Well	Fair	Poor
A. The delivery of the session?	25	5	0	0
B. The presenter's enthusiasm for the subject?	27	2	0	0
C. The presenter's knowledge of the subject?	30	0	0	0
D. The presenter's preparation for the session?	28	2	0	0
E. The training aids used (handouts, slides, web sites)?	24	4	2	0
F. Apply GIS to education?	25	3	2	0

3. Please answer the following questions:	Yes	No	Maybe
A. Will this session be helpful to you in your current position?	16	1	13
B. Will this session be helpful to you in your future assignment?	16	0	14
C. Would you recommend this session to a colleague?	29	0	1
D. Would you recommend the presenters to a colleague?	29	0	1

June 28, 2005: 54 Surveys Returned

4. Additional Comments: Please use the space below to provide additional comments on the content, delivery, and/or usefulness of this session:

1. Need training for teachers, pd, and follow-up.
2. Kearny is close in proximity to Mesa and we would love to bring students. I would love to attend the conference.
3. Bring information for conferences on how to use the software and prices.
4. I would love to have someone come out and demonstrate the use of this software to my students.
5. You provided a broad overview of GIS, in a very short period of time. I am looking forward use GIS in my Project Based Learning. I'm a social studies teacher and I will be using it for sure.
6. I'm very interested in a future training on how to use GIS and technology/software.
7. This is an amazing learning and teaching tool. I love it. I'm always trying to get my students to get a "worldview" and a "bird-eye" view of things.
8. Do you know anyone involved in the programming side of this software? I teach web Database Design - Oracle Internet Academy and would be interested in how the database is created.
9. Training for teachers and students. Needs in terms of hardware.
10. This will be extremely useful in all areas of HS instruction. I particularly enjoyed the application (gasoline prices) for example, it opened to ideas for all participants. I would love my staff to get involved in this project and involve my students to this technology. It will fit into my schools theme.
11. I would like to use this technology in conjunction with 2 projects our school won 2 grants for. I would like technological assistance with training and resources.
12. Excellent program that I feel can be used in the educational field.
13. Employment outlook in this field.
14. Thank you for introducing a powerful program.
15. I am interested in your expertise coming to SCT to train our students prior to our project starts.
16. Fantastic - Thanks for the information.
17. I want to use GIS in the SciTech projects. I would like to get more training and support.
18. I think the program is awesome; however with the lack of computers and printers we are limited with the applications. Can we get help in getting some computers into our classrooms - Math, English, and Social Studies?
19. I would like to get my students trained.
20. This is a great tool for projects in Business classes. Student engagement.
21. Informative presentation. Gets me thinking on using as a template in my own curriculum planning - as well as in PBL team.
22. This program could be applied to 3 of the 4 small schools at Kearny. I'm at a loss as to how it could apply to Digital Media and Design theme?
23. The person I job shadowed told us about this software and said he strongly recommended it for our school.
24. I would suggest starting with a definition of GIS.
25. Dry lecture style. Try hands on approach next time. Have teachers demo the CD/websites.
26. Realistically, I have 1 computer in the classroom. Limited access to the computer/writing lab. How can I use this with only 1 teacher computer? In addition, many of the computers are not updated or lack the speed to make it a plausible 20-40 for students in 90 minutes. Who is the contact for SDUSD sol can find out the "people resources"?
27. Already familiar with GIS.
28. Don't know how to apply to Humanities/Arts?
29. The presentation style was extremely boring. You have an interesting product but work to incorporate a less dry speaking voice.
30. Too boring.

July 12: 57 Surveys Returned

4. Additional Comments: Please use the space below to provide additional comments on the content, delivery, and/or usefulness of this session:

1. I'm not actually a teacher so may not use it but find it interesting and can see applications for the school.
2. Hot and succinct
3. For someone like me that program is complicated – went a bit fast.
4. excellent delivery for education I am so excited to use this for our water resource project
5. Thanks for the great ideas/information.
6. I was trained in GIS at NCAR in Boulder CO, I have several books however I like more training
7. Great idea.
8. A good hands on approach
9. Great
10. Very interesting
11. Perhaps a school presentation will increase the interest
12. I enjoyed seeing the technology first hand
13. This seems very complicated from where I sit. The example about OB gas prices was not simple considering the myriad of clicks he made.
14. Please consider applications of GIS to language Arts.
15. It was very good/ useful to get this information, thanks.
16. Please contact me (Principal Wroblewski – SDHS – International Studies) to arrange a time you are available for a staff presentation
17. Thank You.
18. Thank You.
19. Would like additional information and a workshop on how to use the software. Would like more training
20. I could use this technology in my math class – scale mapping.
21. Great idea. Thanks for including it.
22. I had only heard the name of GIS a week ago. Now I can envision students doing all kinds of projects with this system.
23. Have used Megan's Law info, wondering if Geo-caching in classes.
24. Depending on our project, this can be useful and may provide fascinating fieldwork for our students.
25. Very timely introduction to this resource. I had just identified the need for this resource and there it was.

July 26: 30 Surveys Returned

4. Additional Comments: Please use the space below to provide additional comments on the content, delivery, and/or usefulness of this session:

1. Enlightening & would want practice in collecting/inputting data for view on a map.
2. My concern is hardware. All of our school computers are Macs, Many run OS9 with limited RAM (IMACS) to implement we need to buy some new hardware with more memory (ALBA HS)
3. You had addressed the need for teachers getting hands-on experience with a lab/project to do.
4. Our school only has Mac's.
5. Great work. Only suggestion – would be some improvement on presenting more of the “teamwork” needed during the presentation and beyond.
6. The problem is our school site doesn't have the PC computers or graphic cards / hardware necessary to run the GIS. Is there funding available for ALBA to be included in this type of technology? Would like to set up a time with the GIS team to discuss application with our school. I believe that our students who are at risk (zero tolerance expulsion) could benefit from GIS.
7. This is great technology for educational use. I would love for my students to be introduced to this.
8. Amazing technology.
9. Could be a little longer. Excellent presentation overall. Thanks. Lots of ideas.
10. Hardware & memory may be an issue at the high schools.
11. Awareness is great. However, it is/was unfortunate that there was not an opportunity to play with it on a computer while the experts were here. Don't want it to be just one more gadget/application to make “fit” into the curriculum. Maybe you could come later in the conference – or on a follow-up day or two. So how might this be utilized in a 9th grade English class?
12. Very interesting presentation. Would like to know how to use this info. in Language Arts and Foreign Language. Information to give students if interested in pursuing the field. How to upgrade Hardware in our classrooms?
13. Thanks, Put Morse EDT team on your training list early!!
14. Use this in teacher education classes. Offer this at more community colleges.
15. Great delivery – very impressive.
16. Thank you.
17. Do you provide hardware for this project? (ie laptops etc) There are limited supplies at my school site. (SRHS)

Would you consider taking part in a more in depth workshop on GIS in Education later in the year? If so, please provide us with your contact information:
